The people should subscribe for that entire bond issue, if for no other reason than to rebuke Mr. Cleveland for his expressed lack of confidence in them. He is credited with having said that these bonds will have to be sold to the bankers because the people will not buy them. He should be convinced to the contrary.

Here's a little object lesson showing the difference between republi can and democratic administration of national finances: The negoti tion of the bods representing the great war debt of \$2,500,000,000 cost about \$5,500,000, while the Cleveland administration allowed a syndicate to make over \$10,000,000 on an issue of \$62,000,000 in bonds.

It has a population of about 70,000 and is full of business. The business is all done on a cash basis. It offered a fine field to expert miners. Ordinary laborers, however, should not go there. Expert mechanics will earn from \$7.50 to \$10 a day, clerks and the like run from \$75 to \$125 a menth. Things, of course are a bit dear. The water is bad and everybody drinks wine. You get claret from 75e a bottle up. Beer is \$1 a bottle; every kind of ordinary drink is 25c. Then house rent is very expensive. A house which in St. Louis will rent for \$25 a month will bring \$175 in Johannesburg. The reason of this is that lumber is so expensive, costing from \$80 to \$125 per 1000 feet. The houses are, therefore, built of corrugated iron, and are exceedingly hot. South Africa is a good country for a young man; a man in the middle of life, however should stay away.
